Education

Federal University of Pernambuco (UFPE)

Bachelor in Computer Science

Discrete Mathematics Teaching Assistant - 2018.1 - 2021.1

Recife, Brazil

Jan. 2018 - Sep. 2023

Federal University of Pernambuco (UFPE)

Bachelor in Civil Engineering

Recife, Brazil

Jan. 2013 - Nov. 2017

Technical Skills

Programming	Python, SQL, JAVA, HTML, CSS, Javascript, Typescript, Cucumber-Selenium.
Professional Software	Power BI, Tableau, Excel, Angular.
Drawing & Typesetting	Photoshop, Figma, Office, Latex.
Others	ETL, Hypothesis Test, Time Series, Business View, Experimental design, Scrum.
Languages	Portuguese(Native), English(Fluent - Cambridge FCE Certification), Spanish.

Work

Onebeat

Data & BI Analyst

Tel Aviv, Israel (Remotely)

Aug. 2021 - Present

- Head of 3 projects in Brazil, Pague Menos, Novo Mundo and Grand Cru.
- Monitoring the results of 2.000+ stores from 16 companies, through the creation of Dashboards in Power BI/Tableau and routines in Python. In order to predict possible future problems.
- Project modeling and elaboration of solutions using SQL and Python.
- Used machine learning techniques with Python to analyze historical sales data to predict future demand, improving the stock shortage by 74.19% and reducing inventory by 37.21%.
- Worked together with a team from different countries writing executive summaries, detailing the value proposition and strategy to present to end clients and senior leadership.

PET - Informatics

Scholarship holder

Recife, Brazil

Jun. 2018 - Aug. 2021

- Coordinated the Pernambuco Computer Olympiad (OPEI), organizing, seeking resources and preparing the tests, developing the event's logistics and the system for the programming test.
- Organized a Hackathon (HackaPET) with the aim of helping participants to overcome the fear of programming. Organizing, mentoring, seeking resources, developing the event's logistics and the transmission system.
- Gave lectures on computer science to high school students in order to help with their career choice.
- Taught Python for high school students on 2019 summer using PBL (Problem Based Learning)
- Conducting courses for seniors, with basic computer classes.

Portfólio

Marilan	SAC Dashboard created collecting and treating data from SAP ERP.
Globo Group	Marketing area Dashboard created collecting and treating data from ANATEL.
Nexel	Operational, tactical and strategical Dashboard created collecting and treating data from Nexel ERP.
Onebeat Clients	ARAMIS, Calvin Klein, AMARO, TNG, Di Santinni, Pague Menos, Novomundo, Grand Cru, and others.

Projects

Dizer	Music Streaming WebApp build with Angular and tested with Cucumber-Selenium.
Cyclists	Data science project to analyze the fleet of cyclists in Brazil. Using normalization and discretization, presenting visualizations with descriptive statistics and hypothesis testing.
BR Fleet	Data science project to analyze data from the brazil fleet. Using regression prediction, adding MLFlow in training models for tracking and selecting the best hyperparameter over the validation set.
Cegonha	Project to assist parents in choosing their child's name. Developed with Node and React using Redux, based generated with GPT-3 and vectorized using Spacy (Python).
Weird Hall	Project to create a digital exhibition of automatically generated video clips based on the lyrics, harmony and percussion of the song. Developed with Pyhton using Lucid Sonic Dreams.
